

RSC-1020 / 1120

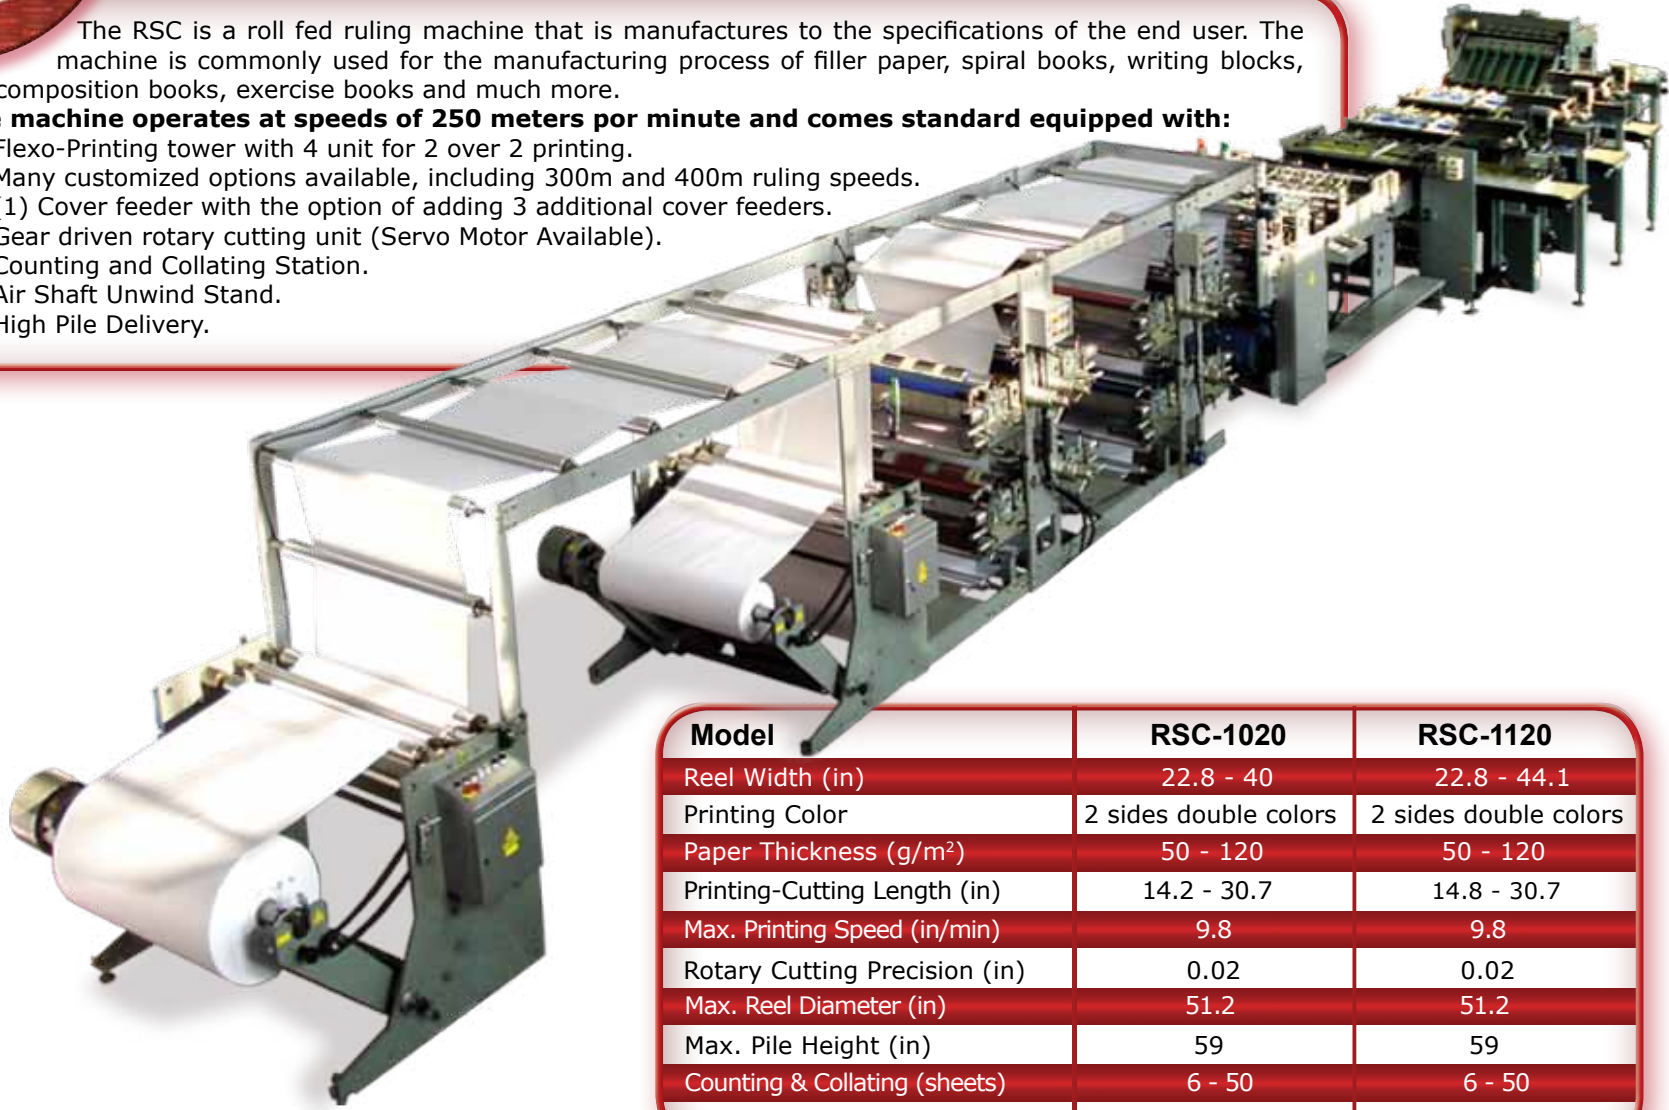

Flexo Ruling Machine with Cover Feeder

The RSC is a roll fed ruling machine that is manufactured to the specifications of the end user. The machine is commonly used for the manufacturing process of filler paper, spiral books, writing blocks, composition books, exercise books and much more.

The machine operates at speeds of 250 meters per minute and comes standard equipped with:

- Flexo-Printing tower with 4 unit for 2 over 2 printing.
- Many customized options available, including 300m and 400m ruling speeds.
- (1) Cover feeder with the option of adding 3 additional cover feeders.
- Gear driven rotary cutting unit (Servo Motor Available).
- Counting and Collating Station.
- Air Shaft Unwind Stand.
- High Pile Delivery.
