Flexo Ruling & Solid Printing Machine

The Advantage Machinery Model RHS-930S/ 1020S are ruling and solid color printing machine that is made using state of the art technology and quality components. The paper on the RHS is roll fed then printed using a flexo ruling tower that uses an enclosed doctor blade system with ceramic anilox rollers. This system allows for high quality flexo printing results. A partial drying system is located between the printing units and a full drying system is located on top of the paper bride. The paper is then cut using a rotary cutting unit and stacked in a deep pile delivery.
