

SCI-L

Advantage MachineryTM

Semi-Automatic Casing in Machine

The Advantage Machinery Model SCI-L is an semi-automatic casing-in machine that is easy to operate and efficient in its production. The machine has a cover guide system which holds the book cover in place. The book block is feed through the front of the machine on a fixed wing which has a push system that takes the book block to a moving wing, which transports it through the gluing system. The glued book is then fed into the book cover where the operator takes the completed book. A foot pedal activates the production cycle, which allows for the operator to keep both hands on the cover book. The guides on the machine allows for precise placement of the block into the book cover. This machine is ideal for on-demand book manufacturers along with short to medium run productions.

Model	SCI-L
Min. - Max. Book Length (in)	3.94 - 14.17
Min. - Max. Book Height (in)	3.94 - 14.17
Min. - Max. Thickness (in)	0.2 - 2.56
Production Speed (pieces/ min)	12
Power (kW)	1.5
Weight (kg/ Lbs.)	570 / 1257
Machine Dimensions L x W x H (in)	64 x 41 x 73
