

DW-CL

Advantage Machinery™

Double Wire Closing Machine

The Advantages Machinery Model DW-CL is semi-automatic double wire inserting and closing machine. The machine takes the double wire from either a spool or the DW-F forming machine and counts it. Once the appropriate number of loops are counted it cuts the wire into a strip and transports it onto the book insertion section. The operator takes the pre-perforated sheets and places the sheets onto the wire. Because that the binding lays on a rail it is very easy for the operator to fix the pre-perforated sheets in the double wire. The sheets with the inserted double wire are then pushed onto a device that transports the group into the closing section. The finished product is delivered onto a delivery conveyor.

Model	DW-CL
Max. Width (in)	14.2
Max. Speed (books/ hour)	300 - 600
Power (kW)	1
Air Requirement (PSI)	70 - 112
