Automatic Exercise Book Machine

The SAC is an automatic machine for the mass production of exercise books. The machine is manufactured using state of the art technology and high quality components. The machine is roll fed, prints 2 colors on each side, the paper is sheeted, counted and grouped. A cover is inserted before the wire stitching station. The grouped sheets are then folded, the spine is squared, the front of the book is trimmed and is cut into individual books. The machine can come with many options such as additional unwind stands, rotary micro-perforation unit, additional cover feeders, in line round corner, book flipping station, side delivery and in-line packaging.
