Min. Dimensions (in)	14 1/8 x 14 1/8	14 1/8 x 14 1/8

TME

Semi-Automatic Flute Laminating Machine

The Advantage Machinery Model TME board laminating machine is a high production machine that only requires one operator. The machine has a feeding station that consist of an automatic bottom feeder that can be used to feed corrugated board, thin board and rigid boards. The operator manually feeds the top board, which is usually printed, and is taken through the glue applicator and is automatically mounted onto the bottom sheet. The mounted product is then transported through a series of pressure rollers and is delivered onto a table
