

LA-78 / 98

**Advantage Machinery**<sup>TM</sup>

## Automatic Thermal Laminator

LA series automatic laminator is a compact machine designed for thermal laminating. This machine is equipped with an automatic paper feeder, heated laminating, and divisional cutting.

The electrical components are controlled by state of the art PLC system. The heating roller heats up using recirculating oil in order to insure the accuracy of the laminating temperature.

The machine has a compact structure with high degree of automatization. This is the perfect choice for any business that laminates high quantities.

Model	LA-78	LA-98
Max. paper (mm)	780 x 1040	980 x 1040
Min. paper (mm)	280 x 300	280 x 300
Weight of paper (g/m <sup>2</sup> )	125 - 500	125 - 500
Max. laminating speed (m/min)	40	40
Weight of the machine (Kg)	1500	1800
Overall dimension (mm)	4800 x 1650 x 1700	4800 x 1850 x 1700

LS-62 / 82 / 110

## Semi-Automatic Thermal Laminator

The model LS-62 / 82 is a semi-automatic thermal laminator manufactured with state of art technology according to the market requirements. This machine laminates and cuts at the same time, has an anti-curl device to ensure good finish. Good for short and long runs of advertising materials, book covers, posters, calendars, etc.

Model	LS-62	LS-82	LS-110
Max. paper (mm)	620 x 880	820 x 1040	1100 x 1040
Temperature (°C)	60-130	60-130	60-130°C
Paper thickness (g/m <sup>2</sup> )	80-500	80-500	80-500
Max. Laminating speed (m/min)	0-40	0-40	0-40
Main power (Kw)	6.9	8.7	9.5
Total weight (Kg)	700	900	1100
Dimensions (mm)	3850 x 1150 x 1450	3980 x 1350 x 1450	3980 x 1550 x 1450
