Double Wire Closing Machine

Semi-Automatic Double Wire binding machine can be fed by spool or through forming machine. The machine counts, cuts and places the wire in position to be closed. The operator places the perforated book on the table where the machine takes the book and places it in the wire before closing the wire. The machine can produce between 300-600 books per hour, depending on operator. This machine is ideal for the production of notebook, calendars, agendas, albums, etc.
